## Introduction

With the development of our economy people often hunt for comfort life. As there is enormous amount of traffic jam and the both bus root and service are unorganized in our country so there is nothing convenient then a privet car for movement. People always prefer a used well conditions featureful car then a new less featured car. Budget preference for a same product always varies with people to people. Here comes our project to help people to find their best deal within their budget.

## About Car Hunt BD

In the world of civilization we make the proper way to make it happen to move faster then other, we Focus on innovation car, on that note we start out journey 1989 from a small.garage, we then bye old car and sell it to other,. But as a company we have to move with digital world, every tiny things people can buy from internet so why people had to search thousands of newspaper to find where any auction happen, keeping that in mind we build a fully mordern, organised online auction and selling system, if you are a international user don't you worries we have sever international billing methods too so lets go!

We are a company that willing to make a paradise for car enthusiasts. When its about to buy a car people usually don't have much idea or information to get to know about their desire also there is muck lack info about the pricing of a car. We mainatain our server twice a week. So its quite easy for a person to know about pricing. keeping in mind about the budget and desire of people we build online car auction system and selling system, we start our journey as a small automobile company back in 1989, now we want to take our business one step ahead we digitalise our whole system. We have different billing method so this auction opportunity is for everyone all over the world.

## Purpose and Benefits of Car Auction Management System:

### ● Purpose of Car Auction Management System:

Regardless of their source, vehicles are sent to auction with the main purpose to be sold quickly and hassle-free, and this usually happens at prices that dealers can easily recoup with a small profit from a resale.

### ● Benefits of Car Auction Management System:
